FINAL DECISION AND ORDER

Wisconsin Veterinary Examining Board

The parties in this matter agree to the terms and conditions of the attached Stipulation as the final disposition of this matter, subject to the approval of the Wisconsin Veterinary Examining Board (Board). The Board has reviewed this Stipulation and considers it acceptable.

Accordingly, the Board in this matter adopts the attached Stipulation and makes the following Findings of Fact, Conclusions of Law and Order.

FINDINGS OF FACT

1. Respondent Laurie D. McCabe, D.V.M., DOB February 13, 1961, is licensed in the state of Wisconsin to practice veterinary medicine, having license number 3816-50, first issued on May 21, 1992 and with registration current through December 14, 2015. Respondent's most recent address on file with the Wisconsin Department of Safety and Professional Services (Department) is 13725 West Burleigh Road, Brookfield, Wisconsin 53005.

2. At all times relevant to this proceeding, Respondent was employed as a veterinarian at Burleigh Road Animal Hospital (Hospital), located in Brookfield, Wisconsin.

3. On December 2, 2013, Respondent saw a puppy, Gilligan, for neutering. During the surgery, Respondent located what she believed to be an undescended testicle, cut an incision to verify that the internal tissue was consistent with testicular tissue, removed what she had identified as the testicle and ligated the pedicles.

4. On December 3, 2013, after the patient was found to be unable to urinate, Respondent took a right lateral radiograph and noted a large bladder. Respondent attempted to pass a catheter but met with resistance. Respondent then attempted to manually express Gilligan's bladder and subsequently withdrew 200 ml of fluid from the bladder by cystocentesis.

5. On December 4, 2013, when the patient's condition did not improve, Respondent consulted with the animal's owners and transferred Gilligan to a clinic with board-certified veterinary surgeons for further assessment and treatment.

6. The veterinary surgeons performed an exploratory surgery on Gilligan and determined that Respondent had actually removed his prostate and ligated his urethra. The surgeons indicated that the bladder was intact and viable and there was sufficient urethral tissue remaining to transplant into the bladder and restore the animal's ability to urinate. However, the surgeon indicated that, in his experience, 80% of such cases have life-long urinary incontinence, even with medical management.

7. The owners were consulted and made the decision to euthanize the animal without further surgical procedures.

8. Respondent has performed numerous spaying and neutering procedures in her 23 year career and has never previously encountered a prostate gland at or near the location for the incision to neuter a male dog. She believes that the location of the prostate in Gilligan near the site of the incision was a physical abnormality.

9. Subsequent to this series of events, Respondent and Burleigh Road Animal Hospital have reimbursed to the owners all costs and expenses incurred by them with respect to Gilligan, including the initial purchase price, travel and lodging and veterinary expenses, totaling over \$9,000.00. They also made a donation of \$500.00 to the Portuguese Water Spaniel Rescue Group in memory of Gilligan.

10. Respondent consents to the entry of the following Conclusions of Law and Order.
